

# Open Building Manufacturing System

- the transformation of the industry

**ManuBuild would like to invite you to visit our exhibition at the 2009 Futurebuild event.**

**March 03 - 05 2009 Earls Court, London**

## Futurebuild

- This is the UK's leading event dedicated to what's new in construction. It covers materials, products, methods and processes.
- It takes place alongside Ecobuild and together they will attract over 800 exhibitors and 30,000 visitors.
- Visit [www.ecobuild.co.uk/futurebuild](http://www.ecobuild.co.uk/futurebuild) for more information and for your free registration.

**ManuBuild** focuses on creating a new European "**open building manufacturing system**", enabling the construction of customised buildings from factory-manufactured components, efficiently assembled on site. This requires a fundamental **re-engineering** of the whole construction lifecycle and the **integration** of production methods.

- Watch our presentations, videos and demonstrations.
- Have a walk inside the ManuBuild Building System and investigate smart components such as the "push wall".

## ManuBuild Seminar

**4 March at 15:30**

Listen to the views of some of the organisations involved and hear what they have learnt. There will also be a Q&A session.

## ManuBuild exhibit

Our exhibit is based around the themes of:

- Design & Building Systems.
- Business Process
- Manufacture
- ICT
- Training & Education

On our stand you will be able to:

- Come and talk to those who have been involved in the project.
- View our display material.
